

# LA PICCOLA

---

## GRANDE ITALY

### Water Softener/Filter

1. Rinse and soak the filter in a jug of water. The water will turn an orange/brown colour. Keep rinsing until the water is clear.
2. Place the filter in the water tank in the rear/side of the Lucaffè Espresso machine.
3. This filter removes impurities including calcium from the water reducing the need to descale your machine.
4. Please replace your filter every 3-6 months. They are available from Lucaffè Australia on **1300 866173** or at [www.lucaffè.com.au](http://www.lucaffè.com.au) or email us on - [info@lucaffè.com.au](mailto:info@lucaffè.com.au)
5. The filter 300 is for large water tanks as in the La Piccola “Cecilia” range and the Filter 150 is for smaller tanks as in the La Piccola Sara and Bat coffee machines
